

## Select loop

- Select loop is useful to create automatic menu driven script
- Syntax:
  - `select option in requiredOptions` [ options must separate with space ]
  - `do`
  - `use case to execute required option`
  - `done`

### Note:

Select Loop never stops ..... We have to create a logic to stop or else use ctrl+c  
We can change the default display message for select loop using PS3 VARIABLE
